

Nicolás Catena Zapata and his daughter Laura.

“One of the great pleasures of working for a family winery is the joy that comes from looking to the past and planning for the future. As the fourth generation of Catena Zapata vintners, I feel blessed to be part of Argentina’s world-wide revolution with Malbec. My father pioneered this revolution by planting Malbec at an altitude where no one thought that it would ripen. But it did.”

Laura Catena

ADRIANNA VINEYARD

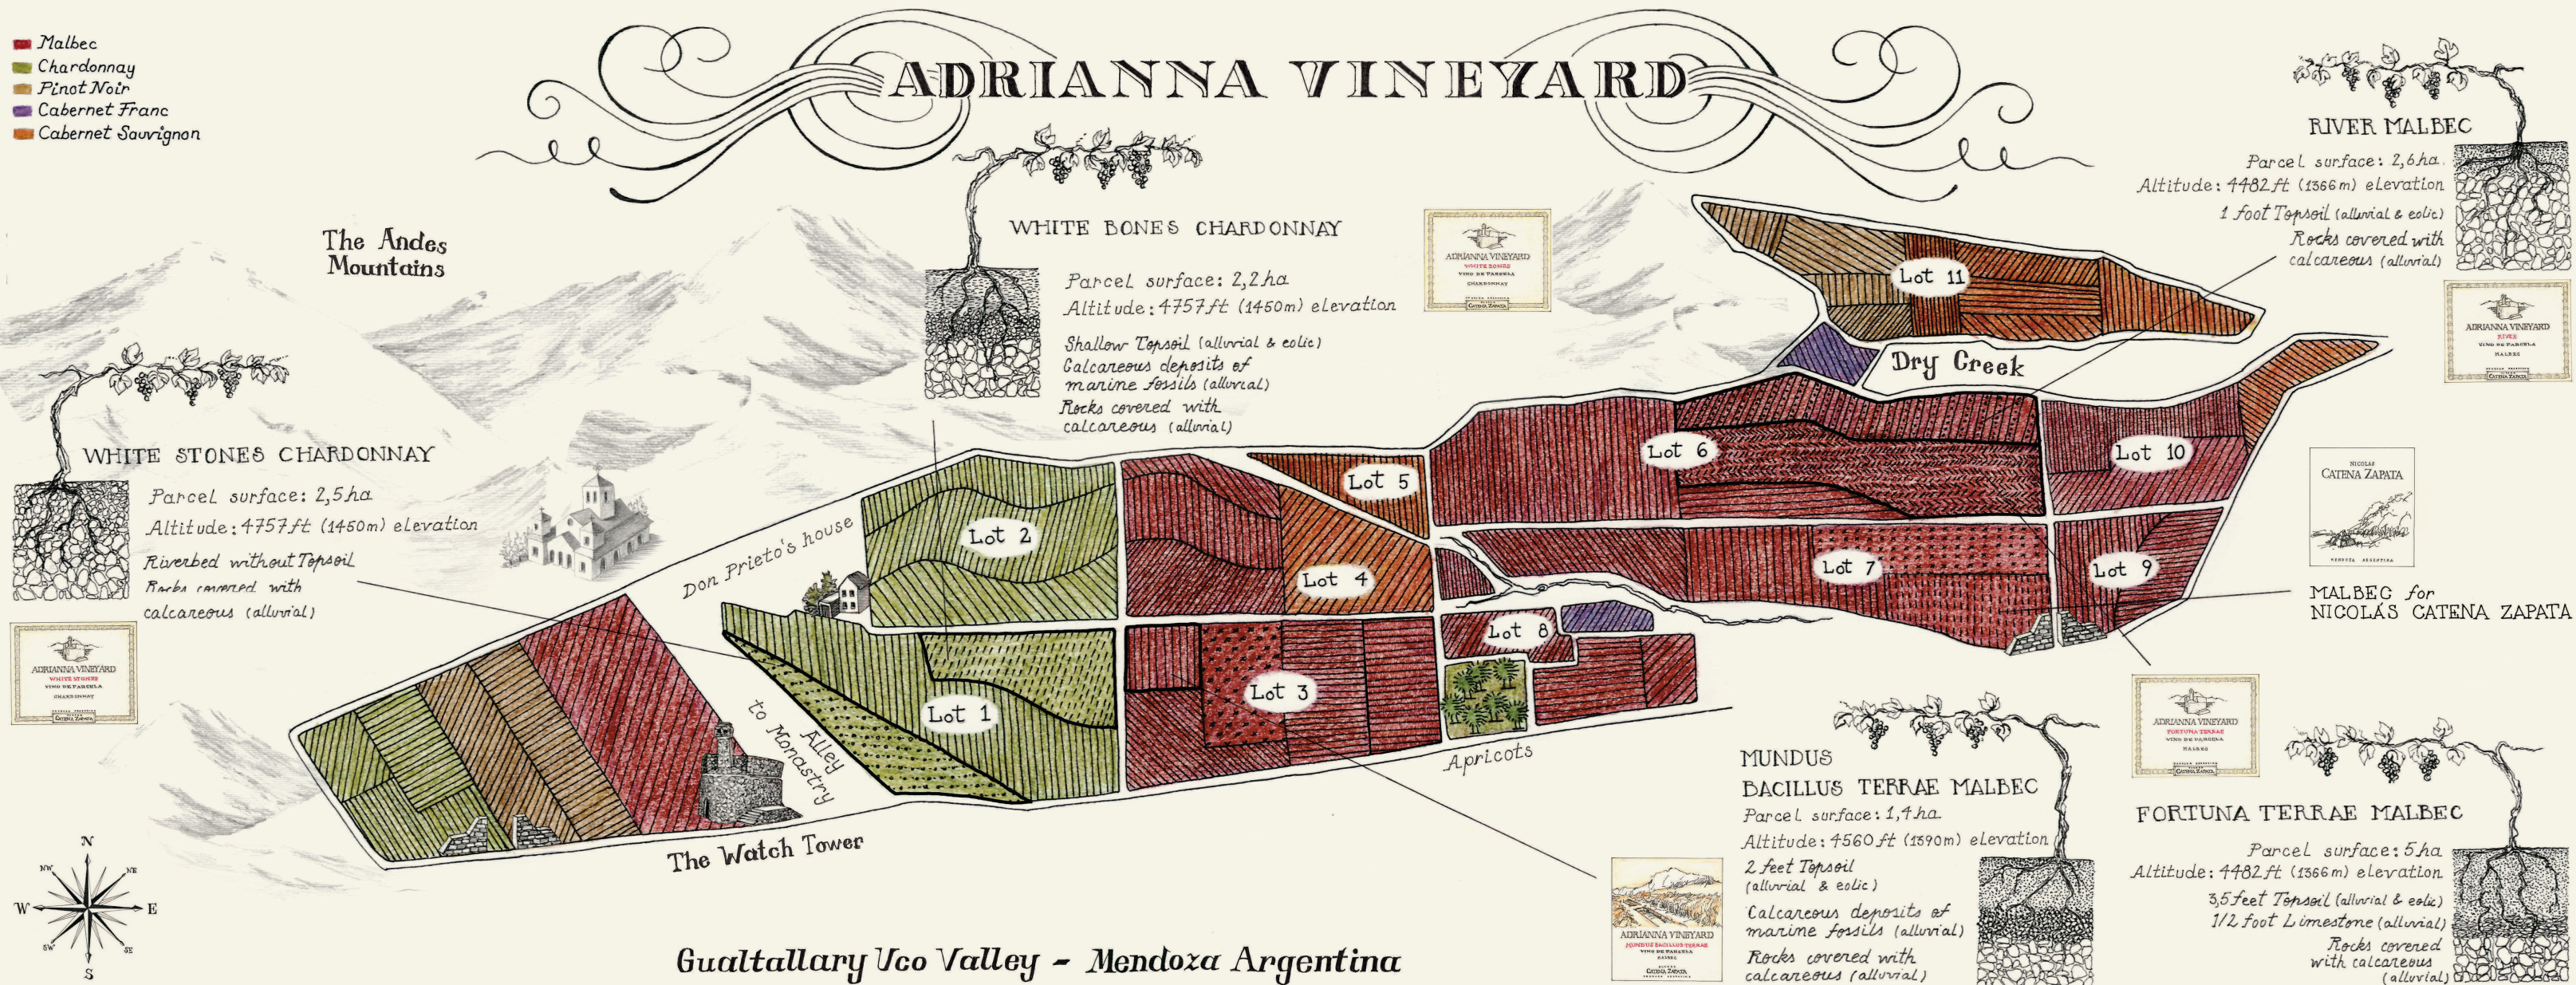

BODEGA CATENA ZAPATA

Since 1902

MENDOZA

ARGENTINA

- Malbec
- Chardonnay
- Pinot Noir
- Cabernet Franc
- Cabernet Sauvignon

ADRIANNA VINEYARD WHITE STONES
The name refers to the ground beneath the vines which is covered with gravel [oval white stones] and in ancient times was the site of a dried river bed.

ADRIANNA VINEYARD WHITE BONES
The soil is layered with limestone deposits that have the appearance of crumbled bones. Because limestone, like bones, is rich in calcium and known for its affinity to chardonnay, we named this wine White Bones.

ADRIANNA VINEYARD RIVER
This cuvée takes its name from a small parcel of the Adrianna Vineyard that is completely covered with oval white stones and was the site of an ancient riverbed. The abundant stones provide optimal drainage and extreme temperatures. They absorb heat and moderate the nights, but also function like ice cubes after a very cold night. Stony soil Malbecs tend to be extremely aromatic, rich and elegant, just like the River Malbec from Adrianna.

ADRIANNA VINEYARD MUNDUS BACILLUS TERRAE
The soils in this 1.4 hectare parcel are filled with scattered limestone and marine deposits that covered the region millions of years ago. The limestone layers are well-drained and particularly rich in rhizobacteria, the microorganisms that help vine roots withstand stress and absorb nutrients. Thus, the name “mundus bacillus terrae” or “elegant microbes of the earth”.

ADRIANNA VINEYARD FORTUNA TERRAE
Fortuna Terrae means “luck of the land” in Latin, and indeed, our vines from this parcel of the Adrianna Vineyard are lucky. The deep loamy soils are home to many varieties of native grasses which prevent erosion and attract beneficial insects, singing birds and mountain foxes. Because of the freshness imparted by the deep soils and high altitude, the wines of Fortuna Terrae have optimal acidity and delicate floral aromas.
